SUBJECT INDEX

Cellulose and Cellulose Derivatives

Formation des alcali-celluloses en milieu hydro-alcooliques, C. Legrand et A. Grund, 527

Chemical Reactions of Polymers

Some relationships between organosilicon compounds and analogous carbon compounds, Henry Gilman and G. E. Dunn, 253

Copolymerization

Structure of copolymers from polymerization of ethylene on polyvinyl acetate, J. R. Roland and L. M. Richards, 61

Preparation of 1,3,5-trivinyl-2,4,6-trichlorobenzene and its copolymerization with styrene, Sidney D. Ross and Moushy Markarian, 219

Thermodynamics of high polymer solutions. VI. The compatibility of copolymers, Robert L. Scott, 423

Fluorine-containing polymers. I. Copolymers of perfluoro-olefins, R. M. Adams and F. A. Bovey, 481

Polymerizable derivatives of long-chain fatty acids. VII. Copolymerization of vinyl acetate with some long-chain vinyl esters, William S. Port, E. F. Jordan, Jr., John E. Hansen, and Daniel Swern, 493

Effect of aluminum chloride on a radical copolymerization, Howard C. Haas and Estelle R. Karlin, 588

Degradation

Rates of thermal degradation of polystyrene and polyethylene in a vacuum, Samuel L. Madorsky, 133

Degradation of long chain molecules as a reverse polymerization process and degradation polymerization processes, H. H. G. Jellinek, 369

On the photodegradation of methyl methacrylate and determination of absolute rate constants, Robert Simha, 465

Light Scattering

An investigation by light scattering of the state of aggregation of amylose in aqueous solutions, Eugene F. Paschall and Joseph F. Foster, 73

Further studies by light scattering of amylose aggregates. Particle weights under various conditions, Eugene F. Paschall and Joseph F. Foster, 85

Determination of the molecular weights of fractionated polyvinyl acetates by a new type of light-scattering instrument, P. Bosworth, C. R. Masson, H. W. Melville, and F. W. Peaker, 565

Mechanical Properties and the Solid State

The elasticity of polythene melts, E. A. W. Hoff, 41

Mechanical properties of discrete polymer molecules, W. O. Baker, W. P. Mason, and J. H. Heiss. (*Errata*, article in *J. Polymer Sci.*, **8**, 129–155, 1952), 170

Ratio of tensile strength to melt viscosity for high polymeric materials, Raymond F. Boyer, 289

Studies concerned with the structure of collagen. II. Stress-strain behavior of thermally contracted collagen, Norman M. Wiederhorn and Gerald V. Reardon, 315

Abrasion of rubber by a needle, A. Schallamach, 385

Effect of cold drawing on the infrared band of polyethylene at 13.7 microns, F. M. Rugg, J. J. Smith, and J. V. Atkinson, 579

Molecular Structure and Shape

Études optique de la morphologie des particules de thymonucléate de sodium en fonction du *p*H et en solution diluée, P. Horn, J. Leray, J. Pouyet, et Ch. Sadron, 531

Ultramikroskopische beobachtungen an polystyrollösungen, J. W. Breitenbach und E. Duch, 547
Spectral studies of polyvinylpyrrolidone (PVP), Gerald Oster, 553
Effect of cold drawing on the infrared band of polyethylene at 13.7 microns, F. M. Rugg, J. J. Smith, and J. V. Atkinson, 579

Molecular Weight and Molecular Weight Distribution

Further studies by light scattering of amylose aggregates. Particle weights under various conditions, Eugene F. Paschall and Joseph F. Foster, 85
Intrinsic viscosity–molecular weight relation for polymethyl methacrylate: effect of size distribution, Bahattin Baysal and Arthur V. Tobolsky, 171
Molecular weight distribution in polystyrene. II. Experimental, Raymond F. Boyer, 197
A new molecular weight distribution technique for polystyrene. I. Theory, Raymond F. Boyer. (*Errata*, article in *J. Polymer Sci.*, **8**, 73–90, 1952), 216
Molecular weight dependence of intrinsic viscosity of polymer solutions, W. R. Krigbaum, L. Mandelkern, and P. J. Flory, 381
The radial distribution functions of electrically charged macromolecules in solution, John G. Kirkwood and Jacob Mazur, 519
Determination of the molecular weights of fractionated polyvinyl acetates by a new type of light-scattering instrument, P. Bosworth, C. R. Masson, H. W. Melville, and F. W. Peaker, 565
Viscosity slope constant k' and its variation with molecular weight and temperature, L. H. Cragg and R. H. Sones, 585

Osmotic Pressure

Treatment of osmotic pressure data, W. R. Krigbaum and P. J. Flory, 503
A high temperature osmometer, S. H. Pinner and J. V. Stabin, 575

Physical Properties

Effect of chemical structure on physical properties of isomeric polyesters, E. F. Izard, 35
Relation of composition of polyvinyl acetals to their physical properties. I. Acetals of saturated aliphatic aldehydes, Andrew F. Fitzhugh and Robert N. Crozier. (*Errata*, article in *J. Polymer Sci.*, **8**, 225–241, 1952), 96
Vapor pressures of methyl methacrylate and styrene, S. Bywater, 417

Polyelectrolytes

Effect of added potassium bromide on the high field conductance of a polyelectrolyte in aqueous solution, F. E. Bailey, Jr., and A. Patterson, Jr., 285
Activity coefficient of byions and ionic strength of polyelectrolyte solutions, Ikumi Kagawa and Kakuji Katsuura, 405
Polysoaps. IV. Dissolution phenomena of a poly-4-vinylpyridine derivative, Ulrich P. Strauss, Steven J. Assony, Earl G. Jackson, and Lionel H. Layton, 509
The radial distribution functions of electrically charged macromolecules in solution, John G. Kirkwood and Jacob Mazur, 519

Polymers, New

Polyalkylene sulfides containing silicon. XI, C. S. Marvel and Harry N. Cripps, 53
Preparation of 1,3,5-trivinyl-2,4,6-trichlorobenzene and its copolymerization with styrene, Sidney D. Ros and Moushy Markarian, 219
Butadiene popcorn polymer, G. H. Miller, R. L. Alumbaugh, and R. J. Brotherton, 453
Fluorine-containing polymers. I. Copolymers of perfluoro-olefins, R. M. Adams and F. A. Bovey, 481

Polymerization, Catalysts and Mechanisms

Branching mechanisms in the polmerization of vinyl acetate, O. L. Wheeler, E. Lavin, and R. N. Crozier, 157
Studies in continuous polymerization, F. T. Wall, C. J. Delbecq, and R. E. Florin, 177
Polymerization rate of methacrylic acid, S. H. Pinner, 282

Reactivity ratios of some monomer pairs, Howard C. Haas and Myron S. Simon, 309
Redox recipes. VI. Redox systems containing potassium chromate as oxidizing constituent, I. M. Kolthoff and E. J. Meehan, 327
Redox recipes. VII. A recipe with ferric versenate, hydrazine, and hydroperoxide as activating system (veroxazine recipe), I. M. Kolthoff and E. J. Meehan, 343
Redox recipes. VIII. A recipe with ferric versenate, sodium sulfide, and hydroperoxide as activating system (veroxasulfide recipe), I. M. Kolthoff and E. J. Meehan, 433
On the photodegradation of methyl methacrylate and determination of absolute rate constants, Robert Simha, 465
A convenient notation for redox polymerization systems, Robert L. Patrick, 467
Mechanism of biradical-initiated polymerizations, Bruno H. Zimm and John K. Bragg, 476
Some experiments on bulk polymerization of vinyl chloride, E. J. Arlman and W. M. Wagner, 581

Polymerization, Condensation

Molecular distribution in condensation polymers, Walter H. Stockmayer, 69

Polymerization, Emulsion

Normal and crosslinked polystyrene. II. Viscosity behavior of polystyrene cross-linked in emulsion polymerization, L. H. Cragg and J. A. Manson, 265

Polymer News

K. H. Meyer, *In Memoriam*, 193
Symposium on the chemistry of wood and wood constituents and symposium on macromolecules, 252

Reviews

Progress in the chemistry of organic natural products, Vol. VIII, L. Zechmeister, 593
Kunstseide und Stapelfaser, Arthur Zart, 593
Vinyl and related polymers, Calvin E. Schildknecht, 594

Rubbers

Stability of the vulcanized crosslink in butyl rubber: theory and application, R. L. Zapp and F. P. Ford, 97
Mastication of rubber. I. Mechanism of plasticizing by cold mastication, M. Pike and W. F. Watson, 229
Abrasion of rubber by a needle, A. Schallamach, 385
Butadiene popcorn polymer, G. H. Miller, R. L. Alumbaugh, and R. J. Brotherton, 453

Solutions and Solution Properties

Effects of hampered draining of solvent on the translatory and rotatory motion of statistically coiled long-chain molecules in solution. Part II. Rotatory motion, viscosity, and flow birefringence, Hans Kuhn and Werner Kuhn, 1
An investigation by light scattering of the state of aggregation of amylose in aqueous solutions, Eugene F. Paschall and Joseph F. Foster, 73
Dilatometry in the polymerization of styrene, W. Cooper and R. K. Smith, 463

Thermodynamics and Statistics

Sorption of vapors by polymers, Terrell L. Hill and John W. Rowen, 93
Thermodynamics of high polymer solutions. VI. The compatibility of copolymers, Robert L. Scott, 423
Relation between (apparent) second-order transition temperature and melting point, Ralph G. Beaman, 470

Viscosity

Intrinsic viscosity–molecular weight relation for polymethyl methacrylate: effect of size distribution, Bahattin Baysal and Arthur V. Tobolsky, 171
Normal and crosslinked polystyrene. II. Viscosity behavior of polystyrene crosslinked in emulsion polymerization, L. H. Cragg and J. A. Manson, 265
Instrument for determining shear dependence of intrinsic viscosity of high polymer solutions, J. Schurz and E. H. Immergut, 279

Solution viscosity and molecular weight of polystyrene prepared by aluminum chloride catalysis, D. O. Jordan and A. R. Mathieson, 287

Ratio of tensile strength to melt viscosity for high polymeric materials, Raymond F. Boyer, 289

Polysoaps. III. Influence of solubilized benzene on reduced viscosity of an *n*-dodecyl bromide addition compound of poly-2-vinylpyridine, Lionel H. Layton, Earl G. Jackson, and Ulrich P. Strauss, 295

Molecular weight dependence of intrinsic viscosity of polymer solutions, W. R. Krigbaum, L. Mandelkern, and P. J. Flory, 381

Critical concentration effects in the viscosities of dilute solutions of high polymers, W. R. Moore and J. Russell, 472

Determination of absolute turbidities, Gerald Oster, 525

Viscosity slope constant k' and its variation with molecular weight and temperature, L. H. Cragg and R. H. Sones, 585

Vulcanization and Crosslinking

Stability of the vulcanized crosslink in butyl rubber: theory and application, R. L. Zapp and F. P. Ford, 97

Branching mechanisms in the polymerization of vinyl acetate, O. L. Wheeler, E. Lavin, and R. N. Crozier, 157

Mastication of rubber. I. Mechanism of plasticizing by cold mastication, M. Pike and W. F. Watson, 229

Normal and crosslinked polystyrene. II. Viscosity behavior of polystyrene crosslinked in emulsion polymerization, L. H. Cragg and J. A. Manson, 265

X-Ray Investigations

X-ray diffraction studies of addition compounds of amylose with inorganic salts, Frederic R. Senti and Lee P. Witnauer, 115

Interpretation des diagrammes de diffusion des rayons X par des systemes denses des particules, G. Fournet, 539

Les possibilités de la diffusion des rayons X aux petits angles dans l'étude des grosses molécules, A. Guinier, 557
